Company description

Wolftank-Adisa is active in the petrochemical industry and environmental technology, focusing on the remediation and monitoring of tank farms and environmental protection services for contaminated soils and facilities. The patented application technology, based on high-tech, in-house developed epoxy resins, enables cost-effective and rapid repair of defective tank systems. In addition, a specific service with continuous remote monitoring of rehabilitated plants is included. The complementary engineering and environmental protection services for contaminated soils and facilities ensure that the customers' entire value chain is covered. A major growth driver has been and is likely to remain, the commissioning and de-commissioning of traditional petrol stations, LNG and hydrogen petrol stations.

EQUITY STORY - WHY TO INVEST

- Wolftank-Adisa benefits from its relatively strong position in a highly fragmented niche market. A regulatory environment as well as required certifications create high barriers to entry, protecting an otherwise low capital intensive industry from emerging competition. Wolftank differentiates by having a sophisticated track record – a priceless asset as failure to perform often can lead to disproportionate reputational damages and ultimately costs. On top, scale advantages allow for technological leadership (e.g. in house epoxy resin development / tank repair automation via robotic) or the ability to operate own training facilities for a still labor intensive task.
- The beauty of the equity story is however massive structural growth and pent-up demand driven by increasing environmental awareness and secular growth drivers due to the commissioning of new LNG and hydrogen petrol stations in Europe, which alone will grow by some 50% p.a. (CAGR 19-25E). A game changing acquisition where Wolftank buys out one of its major competitors sets the stage for double digit top- and bottom-line growth in the future.
