Wolftank subsidiary receives order for the construction of a hydrogen filling station in Bolzano

Wolftank DGM builds a hydrogen bus filling station for SASA

Innsbruck, 04.05.2021 - Wolftank DGM, a subsidiary of Wolftank-Adisa Holding AG, has been awarded a contract by SASA, the in-house company and operator of public transport for the Province of South Tyrol and the municipalities of Bolzano, Merano and Laives, to build a hydrogen refueling station in Bolzano for the operation and refueling of its twelve new hydrogen buses.

The new infrastructure is being built as part of the EU-funded JIVE and MEHRLIN projects, which support the expansion of hydrogen mobility and the construction of hydrogen refueling stations for bus fleets and is funded by the Province of South Tyrol and the 2 aforementioned EU projects. The new hydrogen filling station was adapted to the requirements of an urban bus fleet. The focus is on redundancy for security of supply on the one hand and modular expandability on the other.

In the first expansion stage, the filling station is designed for approx. 15 refuelings per day, whereby parallel refueling of two buses at the same time is possible with a refueling time of approx. 10 minutes. Thanks to its modular expandability, the facility is a suitable base for a fleet of hydrogen buses that will grow continuously in the coming years.

"The work is scheduled to be completed by the end of June", said Petra Piffer, CEO of SASA, "at which time the new fleet will also be delivered and ready for use."

"We are very pleased with this order, which represents a first major milestone in what is now an increasingly dynamic and fast-growing hydrogen sector as an increasingly important, sustainable energy source", said Dr. Peter Werth, CEO of the Wolftank Group. "The award of contract by SASA is a great reference for us as well as a further incentive to put our long-standing know-how in the planning, construction and operation of gas plants and filling stations at the service of sustainability and the environment in Europe," Werth continued.

About Wolftank-Adisa Holding AG:

Wolftank-Adisa Holding AG is the parent company of an international group of companies focusing on environmental protection services for polluted soil, facilities and water, remediation and monitoring of (large) tank facilities, as well as full-service engineering services for (Hydrogen/LNG) tank facilities.

The company is active worldwide and has various patented application technologies at its disposal with the aid of high-tech epoxy resins developed in-house.

The shares of Wolftank-Adisa Holding AG (WKN: A2PBHR; ISIN: AT0000A25NJ6) are listed on the Frankfurt, Stuttgart and Munich stock exchanges, in the direct market plus segment of the Vienna Stock Exchange AG, on Quotrix and on Xetra.
